Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 July 2007.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 2-5, 7-12, 22-27, 31-43 and 45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Foran (US Patent No. 5,554,252) in view of Reis et al (US Patent 5,800,661).

Foran discloses a machine for bonding two sheets together including a lower portion (82) for holding skin (44) and upper surface base (78) which contains a vacuum pads (66) for holding the reinforcement member (46). The vacuum pads have open space thereon which amounts to a recess channel, a fluid line, and a vacuum source. Foran includes: an alignment mechanism for the lower portion seen clearly in Figure 8; means for moving the upper surface to the lower portion; and several support shafts on the upper surface. Figure 7 shows the plunger on the end of locator (68) for contacting the sheet material, while Figure 9 of Foran shows the support (84) which engages with the second sheet.

However, Foran does not disclose the vacuum system with an elongated channel as claimed by the applicant. Regarding this difference, the applicant is directed to the reference of Reis.

Art Unit: 1791

Reis discloses a vacuum fixture for manipulating materials. As shown in Fig. 3, vacuum fixture 10 may comprise grooves 26 with apertures 28 which are fluidly connected to a vacuum manifold. These apertures may be dimensioned to any suitable shape such as elongated slots or circular apertures. See col. 6, lines 24-42.

It would have been obvious to one having ordinary skill in the art to substitute elongated vacuum slots or channels, as taught by Reis, for the vacuum pads of Foran in order to provide the predictable result of more precisely and reliably holding the materials.

Allowable Subject Matter

3. Claims 6 and 44 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments with respect to claims 2-5, 7-12, 22-27, 31-43 and 45 have been considered but are moot in view of the new ground(s) of rejection.

Telephone/Fax

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Sells whose telephone number is 571-272-1237. The examiner can normally be reached on M-F 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Philip Tucker can be reached on 571-272-1095. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 1791

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
